

Preserve with Confidence.
Unleash Therapeutic Potential.

CryoEase-PF

The **first and only** DMSO & Protein-free cryopreservation solution designed to reliably store and transport **sensitive cells** at both frozen and hypothermic temperature.

>85% MSCs cell viability after 72 hours at 4°C post-thaw

**Preserves
Functional Integrity**

ZERO

DMSO Toxicity

**Reduces
reliance on dry
ice or liq. N₂**

Simplifies Transport at 4°C

Ideal for

- Clinical Settings
- Research Laboratories
- Biobanking
- Veterinary Medicine

**GMP-
compliant
materials**

**Dual-
Temperature
Compatibility
for cell storage**

Hypothermic
condition
4-10°C
Sub zero
temperature
<0°C
